

Braintree Town Council

ORDER NO: 16 021

DATE FILED: APRIL 5, 2016

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

To install and maintain approximately 1,404 feet more or less of 4 inch gas main in West St., Braintree. From the existing 4 inch gas main at house #330, northerly to Herbert Rd. Approximately 137 feet, more or less, of 2 inch gas main in Ellsmore Terr., easterly from West St. to Colby Rd. And, approximately 314 feet, more or less of 2 inch gas main in Colby Rd., from Ellsmore Terr., southerly to the end of the gas main. All of which to replace and abandon the existing 3 inch gas main in West St., the 2 inch gas main in Ellsmore Terr., and the 2 inch and 1 ½ inch gas mains in Colby Rd. with the following conditions:

BELD: Engineering has reviewed the NGRID Gas Petition and finds no underground electric utility conflicts within the proposed scope of work.

DPW: These sections of roadway are not under moratorium. The Town intends to complete the reconstruction of Ellsmore Terrace and Colby road later this year, so prompt completion of the gas main installation would avoid coordination problems with the Town's contractor. We'd recommend that the petition be granted under the normal conditions, with emphasis on the requirements that the gas main be laid outside of the trench of the water mains in service and that the trench pavement not be left low for any length of time; We also recommend that the following requirement be added to the permit, if it is to be granted:

Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.
