

Braintree Town Council

ORDER NO: 17 079

DATE FILED: JANUARY 19, 2018

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

To install and maintain approximately 55 feet more or less of 4 inch gas main in Sumner Avenue from the house #64 to the end of main on Hollingsworth Avenue. All of which to replace and abandon the existing main on Sumner and Hollingsworth with the following conditions:

BELD: There are No underground electric utility conflicts or special requirements within the proposed scope of work.

DPW: We would recommend that approval would be based on our standard conditions but additionally on the condition that the trench repair work within Hollingsworth Ave include crown to curb milling and re-paving the extent of the excavation plus another 5 foot length at each edge in the direction of traffic. (The actual repair area will be delineated after the installation since the lateral trench in Hollingsworth Ave will be in the intersection at Sumner Ave.) All pavement markings shall be replaced in-kind. Curbs and sidewalks must be repaired or replaced, each to the satisfaction of the Highway Superintendent. Infrared treatment of seams may be required at the discretion of the Highway Superintendent.

The petition should also be subject to the other standard conditions, with emphasis on the requirements that the gas main be laid outside of the existing water and sewer trenches and that the trench pavement not be left low for any length of time; we also recommend that the following requirement be added to the permit, if it is to be granted:

Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.
