

Braintree Town Council

ORDER NO: 17 066

DATE FILED: SEPTEMBER 29, 2017

REQUEST OF: NATIONAL GRID

To install and maintain approximately 70 feet of 2 inch gas main in Conrad Street, from the existing 2 inch main at house #4 Conrad Street to the Quincy City Line in order to tie together the high pressure mains with staff recommendations:

BELD: No underground electric utility conflicts or special requirements within the proposed scope of work.

DPW: has reviewed the subject petition for the street opening location and have the following recommendations:

Conrad Street was totally reconstructed in 2013 and so predates the current moratorium but is governed by the prior moratorium through 2018. If the Council finds circumstances warranting approval, in addition to the standard conditions we'd recommend that the approval be conditioned upon the petitioner 1.) laying the gas main outside of the trench of the water and sewer mains in service; 2.) not leaving the trench pavement low for any length of time; 3.) after maintaining the trenches through one full winter but within one year of the temporary trench repair, mill and overlay the full width of the street for the full length of the excavation along the road; 4.) repair or replace curbs and sidewalk areas disturbed each to the satisfaction of the Highway Superintendent; and 5.) provide for infrared treatment of seams at the discretion of the Highway Superintendent. We also recommend that the following requirement be added to the permit, if it is to be granted:

“Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.”
