

Braintree Town Council

ORDER NO: 17 039

DATE FILED: JUNE 13, 2017

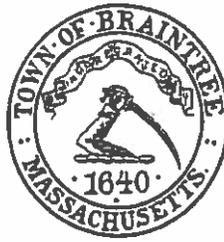

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

To install and maintain approximately 1795 feet of 4 inch gas main in Commercial Street, from the Quincy Town Line to the end of the main near house #675, approximately 217 feet more or less of 2 inch gas main in Bower Road, from the new 4 inch gas main in Commercial Street to the end of the main at Rogers Circle and approximately 250 more or less of 2 inch gas main in John Paul Circle from the new 4 inch gas main in Commercial Street to the end of the main at house #12. All of which to replace and abandon the 3 inch gas main in Commercial Street and the 4" gas mains in Bower Road and John Paul Circle with the following conditions:

BELD: No underground electric utility conflicts or special requirements within the proposed scope of work.

DPW: This section of Commercial Street is not under the moratorium. The street has not been resurfaced in several years. Commercial Street is scheduled to have a new water main installed this summer and we would recommend that the petition for this section is granted as soon as possible so that both the water main and gas main projects can be coordinated and completed in a timely manner. This section of John Paul Circle is not under the moratorium. The petitions should be granted for Commercial Street and John Paul Circle under the normal conditions, with emphasis on the requirements that the gas main is laid outside of the proposed new water main trench and that the trench pavement not be left low for any length of time. This section of Bower Road is under the new ordinance. We would recommend that the petition not be granted. However if the Council finds extenuating circumstances warranting approval, in addition to the standard conditions, that the approval be conditioned upon the petitioner, after maintaining the trenches through one full winter but within one year of the temporary trench repair, mill and overlay the full width of each street for the full length of the excavation along the road plus 25 feet on each end, replacing any pavement markings in kind, repairing or replacing curbs and sidewalk areas disturbed each to the satisfaction of the Highway Superintendent and infrared treatment of seams at the discretion of the Highway Superintendent, that the gas main be laid outside of the trench of the water and sewer mains in service and that the trench pavement not be left low for any length of time; We also recommend that the following requirement be added to the permit, if it is to be granted:

Braintree Town Council

ORDER NO: 17 039

PAGE 2 OF 2

Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.
