

Braintree Town Council

ORDER NO: 17 046

DATE FILED: JUNE 16, 2017

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

**To install and maintain approximately 320 feet more or less of 2 inch gas main in Washington St., Braintree. From the existing 2 inch gas main at Jefferson St. southerly to the existing gas main at the intersection of Hancock Ave. All of which to replace and abandon the 2 inch gas main in Washington St. with the following conditions:**

**BELD:** Washington Street: BELD has a 13,800 volt underground system on the road. This is a concrete encased duct bank to be identified through the Dig safe process.

**DPW:** This section of Washington Street is State Highway that has not been resurfaced recently and so is not under the moratorium. As such, we recommend that if the State allows the excavation the petition be granted under normal conditions, with emphasis on the requirements that the gas main be laid outside of the trench of the water and sewer mains in service and that the trench pavement not be left low for any length of time; We also recommend that the following requirement be added to the permit, if it is to be granted:

Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.
