

Braintree Town Council

ORDER NO: 20 051

DATE FILED: JULY 15, 2020

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

**To install and maintain approximately 735 feet of 2 inch gas main at three separate locations between Audubon Ave and Gordon Rd. Total main installation 735 FT with staff recommendations:**

**BELD:** There are no underground electric utility conflicts or special requirements within the proposed scope of work.

**DPW:** This section of Argyle Road is not under the moratorium. The street has not been resurfaced in several years. Argyle Road is scheduled to have a new water main installed and we would recommend that the petition for this section be granted as soon as possible so that both the water main and gas main projects can be coordinated and completed in a timely manner. The petition should be granted under the normal conditions, with emphasis on the requirements that the gas main be laid outside of the new water main trenches and that the trench pavement not be left low for any length of time. We also recommend that the following requirement be added to the permit, if it is to be granted:

**“Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor’s engineer and approved by the DPW and Police Department.”**
