

TOWN OF BRAINTREE

IN COUNCIL

ORDER NO: 13 009

DATE: April 1, 2013

ORDERED: NATIONAL GRID

PETITION OF NATIONAL GRID FOR GAS MAIN LOCATIONS

The National Grid hereby respectfully request your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

To install and maintain approximately 30 feet, more or less of 2 inch gas main at Wildwood Avenue, Braintree. From the existing 3 inch gas main at House #234 Easterly to House #236 for a new gas service.

Petition #13 009 was unanimously approved by Council with the following conditions:

DPW: Wildwood Avenue was scheduled to be shimmed and micro-surfaced last year. In fact, the shim course was installed. This shim course creates the shape of the roadway and any trench must be repaired to these same lines and grades. The micro-surface will not repair a trench that is not repaired flush with the adjacent pavement. The micro-surfacing was delayed last year in anticipation of this petition and to facilitate sidewalk construction further down Wildwood Ave and on Park Avenue. It is our recommendation that this petition **should be approved with a requirement that it be completed as soon as possible, no later than this May, and with more rigorous repair specifications than our standard conditions, to include a final hot mix asphalt pavement at least 4" deep being maintained flush with the surrounding pavement. If the trench repair is not neatly at the correct line and grade at the end of June, then a 1 ½ inch grind and inlay to neat lines one foot beyond the trench limits will be required to facilitate our micro-surfacing.**
