RE: *Notification of Scheduled Natural Gas Venting
Algonquin Gas Transmission, LLC
Weymouth Compressor Station (Transmittal No. X266786)*

Dear Mr. Cushing:

Algonquin Gas Transmission, LLC (Algonquin) was issued Air Quality Plan Approval - Transmittal No. X266786 (the Plan Approval) by the Massachusetts Department of Environmental Protection (MassDEP) on August 26, 2019. The Plan Approval authorizes the construction and operation of the Weymouth Compressor Station, 54 Bridge Street, Weymouth, Massachusetts.

This letter is to notify you of venting that may occur at the Weymouth Compressor Station intermittently between June 1st and June 4th as part of the ongoing maintenance and testing of the Weymouth Compressor Station. Algonquin may be required to conduct intermittent controlled venting of natural gas through the compressor case vent stack which is designed to safely vent gas. To minimize the volume of gas that may be vented, Algonquin plans to utilize specialized recompression equipment as appropriate. There may be minor offsite sound impacts associated with this activity during daylight hours.

In accordance with Section 3.B., Table 11, Condition 2 of the Plan Approval for the Weymouth Compressor Station, Algonquin is required to notify MassDEP prior to any scheduled gas releases at the Weymouth Compressor Station that are expected to exceed 10,000 standard cubic feet (scf) of natural gas. Algonquin estimates that up to 70,000 scf of gas could be released as outlined in the table below.

Date	Activity	Anticipated Time of Release	Expected Duration of Release	Estimated Total Volume of Gas Release (scf)	Estimated Total VOC Emissions (lbs)	Mitigation Measures
6/1/2021 through 6/4/2021	Venting associated with station maintenance	Intermittent as needed	5 minutes for each release	Up to 70,000	Up to 10	<ul style="list-style-type: none"> • Use temporary recompression to minimize vented gas

If Algonquin revises its timeline for this potential scheduled natural gas venting, Algonquin will promptly inform MassDEP.

If you should have any questions, please call the landowner information line at (888) 331-6553.

"I certify that I have personally examined the foregoing and am familiar with the information contained in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including possible fines and imprisonment."

Sincerely,

Roy Taylor – Director Field Operations, Northeast Region
